	251.06(11)(b)5. **Outdoor Play Space - Energy-Absorbing Surfaces** Description: The energy-absorbing surface below the climber did not meet the required depth of nine inches of loose fill in a fall radius of four feet.	Staff have been reminded that even though we had new pea gravel delivered last July to a 2 ft depth, the pea gravel compacts, so it is important to continue consistently rake, shovel, maintain pea gravel under & to a 4 ft fall zone around the climber to a depth of 9in. (staff currently filling wheelbarrows & dumping piles to more than 9in depth underneath climber.)	11/24/26
